**Paul & Carol Marquardt- Oakdale**

I am a neat freak! I cannot believe how much work was done and you would never know that they were here. One of the techs even took off his shoes while working on my white rug! Who does that? I would recommend them highly.

**Carol & Robert Brooke – Selden**

We had a lot of contractors at our home this past summer and Secure Operations was the only contractor that stayed on the job until it was finished. Our job was delayed due to the availability of the many other trades involved. I am happy in saying that they were the most prompt and always returned my calls!

**Jim Sullivan – Northport**

Being a hard guy to please, I have to say that the Alarm System, Camera System, Phone System and Computer Networks are running perfectly to date. The systems have been installed for years without any service calls, other than upgrades. I would not hesitate in referring Secure Operations for any of my current and future businesses.

**Chris Perez – Rainbow Multimedia, Inc. – Port Jefferson Station**

I was always worried about falling and being left for hours or days on the floor. My family and I had some real peace of mind while I maintained my independence. I am thankful for Secure Operations Professional demeanor before, during and after my Alert system installation. I even had to use it once and the operators called my family in a minute!

**Grace Nigro – Ridge**

Cliff and his team made us feel like they truly cared. They listened to our concerns about safety, security and cost....and did a wonderful job meeting all of our needs. Having the alarm system gives our whole family peace of mind.

**Harry & Melanie Rasmussen – Coram**
